Keynote Speaker

The Keynote Speaker, Niall Sclater, Director of Virtual Learning at the Open University has a blog you may wish to visit – www.sclater.com/blog

Delegates will have the opportunity to sign up for two of the workshops detailed below, during registration on Thursday 10th July.

Workshops

Workshop 1: Introduction to Moodling for Teachers

A hands-on Moodle course for complete beginners!

This 90 minute session will take you through all the basics from creating a course to adding and editing resources, creating a quiz, questionnaire, blogs and a forum for group discussion. We will also discuss how to create a Moodle course offline and how to upload it at a later stage.

Alastair Wells
*Director of eLearning
The Netherhall School*

Workshop 2: Integrated AFL in Moodle

Dan will take you through the process of setting up online assessment and marking. How to structure courses to allow for easy marking and how to get the best out of Moodle for staff and students alike.

Dan Leighton
*Head of ICT
Cottenham Village College*

Workshop 3: Wiki's in and out of the classroom

We all know and either love or hate Wikipedia, but have you ever registered as a user and edited one of the pages yourself?

Mandy will show how the Wiki activity in Moodle can be set up to engage and support students in making use of this collaborative technology. She is currently working with a group of Media Studies GCSE students who should be developing group based Wikis as part of their coursework. They were given the assignment on the 3rd June 2008, you will be able to see how far and how well they have used it just one month later.

This follows on from Ian Usher's encouragement to the Cambsmoodle launch day participants to read an article called "The Good Teacher" available from Moodle Docs.

Mandy Honeyman
*KS4 Coordinator & ICT Support Manager
Linton Village College*

Workshop 4: Using ContentGenerator.net for assessment in Moodle

Andrew shows how to extend the use of ContentGenerator.net's free and commercial applications. The session will provide practical hands on advice and experience and show you how to use interactive learning games to track student achievement in the Moodle gradebook. You will leave the session with copies of the software to take and use in your school.

Andrew Field

Head of ICT

Neale-Wade Community College

Workshop 5: Planning and Constructing a Moodle Site

“So your technicians have installed a Moodle site, you have a URL but... what next.”

This workshop encourages delegates to think about the look and setup of their site, it will illustrate how to consider themes, manage blocks and set-up courses. It will consider the need for careful planning to avoid later frustration. In addition there will be an overview of basic site administration, managing groups, backing-up courses and restoring them.

Andy Hood

The Bishop's Stortford High School

Gareth Williams

Leventhorpe School
